Our Story

**Once upon time there was only
wood and wood and wood!**

we found ourselves with wood, we shaped our destiny with wood and we always shared this source of peace and aspiration with others. For many years, we tried our best to leave a long-lasting impression of ourselves in the most pleasant place of your home and now by benefiting other elements such as metal and fabric beside wood, we shape your dream more colourful.
From our long-lasting experience, we build a more sustainable and long-lasting structure than ever and in this journey we always try not to sacrifice quality for a more and more quantity.
It is our pleasure to have you on this journey!

Stability along with beauty, everything you expect from a chair

Mission

Our mission is taking risks, building trust, unlocking ideas and increasing values in order to make a world a better place to live

Vision

Our vision is to become one of the main suppliers of home and kitchen furniture during global market over the next three years as well as halve our carbon footprint by 2030.

Values

Our values are our stakeholders' values especially our employees and our customers. We implement ethical principles in all parts of our value chain and committed to our society and environment.

Stability along with beauty, everything you expect from a chair

NS-95

Engineering beside art

A durable combination of wood, metal and plastic with exemplary art beside an engineered structure has created everything you expect from a chair in a modern place

The chair seat is made of polyethylene as a pigmented thermoplastic with attributes like rust-free, low-maintenance, and greater elastic strength. Moreover, it is lightweight and comes in versatile colors.
